SCHOOL MEDICATION AUTHORIZATION

The purpose of allowing medications to be taken by pupils at school is to help provide for their general welfare by following instruction of their physician. It shall be the school responsibility to provide reasonable and prudent supervision while the pupil takes the medication. It shall be the pupil's (parent's) responsibility to take the prescribed medication in accordance with their physician's instructions.

Authorized Health Care Provider means an individual who is licensed by the State of California to prescribe or order medication, including, but not limited to, physician or physician assistant. (AR 5141.21)

Medication may include not only a substance dispensed in the United States by prescription, but also a substance that does not require a prescription, such as over-the-counter remedies, nutritional supplements, and herbal remedies. (AR 5141.21)

Policy Regarding Medication at School

According to California State Education Code 49423, specific procedures must be followed with regard to taking medications at school.

During the regular school day, any pupil who is required to take mediation prescribed by a physician must provide the following every school year:

- 1. A written statement from the physician stating the medication, dose form, dosage, route of administration, purpose of medication and time in which medication is to be taken as well as special instructions or relevant side effects.
- 2. A written statement from the parent/guardian of the pupil granting their permission that the physician's order be carried out.
- 3. For prescription medication: the medication must be in a labeled pharmacy container, labeled by a California pharmacist giving the student name, doctor name, medication, dose form, dosage, route of administration, and schedule. For over the counter medication: the medication must be in the original unopened container.

All medication is to be kept in the health office, unless they physician's order states that the life sustaining medication is to be carried by the student. It is the student's responsibility to come to the office to take the prescribed medication at the designated time.

A parent/guardian can bring medication to the school office and give to their student directly without a physician's order.

This policy is for the protection of all students.

NOTICE – PARENT PLEASE READ BEFORE SIGNING REQUEST

A District Nurse is not present at the school site at all times or on all days when school is in session. Therefore, because assistance may be provided by non-medical District personnel, parents must assure that the physician provides complete, precise, legible, directions and instructions. The District is not responsible for notifying parents before or after prescribed medication is depleted or the expiration occurs. Expired medications will not be administered. This request for District assistance expires at the end of the school year in which it is made.
