

9th Grade DVD Parent Community Group:

You are about to undertake a BIG project as a family—the project of successfully transitioning and moving through high school! There's probably lots of excitement, but also worry and uncertainty, for both students and parents.

Come get anchored in a parent community as you navigate this new transition. When we are anchored as parents, we can more easily help our students get anchored.

We'll focus on what kinds of connection can happen with:

- Our teens as they make this transition
- The teachers who will be supporting our child along the way
- The staff and leadership who will help to hold it all together

Join us for 3 parent connection dates this first semester to support the transition into high school at DVD. We will talk through how we can make this new family project of transitioning to high school full of the kind of connection that supports success.
